

73. The isolated first protein subunit according to claim 71, wherein the first protein subunit is ψ and the second protein subunit is χ .

C 2 conc.
74. The isolated first protein subunit according to claim 71, wherein the first protein subunit is ψ and the second protein subunit is χ .

Add 33 
75. The isolated first protein subunit according to claim 71, wherein the first protein subunit is ϵ and the second protein subunit is θ .

REMARKS

With specific regard to the amendments to the sequences shown in the specification, the correction on page 17 is known from the prior art, "DNA Polymerase III Accessory Proteins," J. Biol. Chem., 268(16):11758, 11760 (1993) and the correction on page 58 is known from the prior art, "DNA Polymerase III Accessory Proteins," J. Biol. Chem., 268(16):11773, 11775 (1993) (copies attached hereto). Accordingly, the amendments to the specification are to bring the sequences into agreement with known reported sequences and, thus, is not new matter. In addition, the new Sequence Listing has been corrected to properly identify these sequences. Further, the new Sequence Listing properly shows the correct numbering of amino acids for SEQ. ID. No. 54.

Applicant respectfully requests that the new Sequence Listing be entered into the specification. The amendments to the Sequence Listing are made to correct obvious

errors in the Sequence Listing as originally filed and, thus, does not introduce "new matter" into the specification.

Respectfully submitted,

Date: August 5, 1997
